

# A SALT LAMP IS BORN

Raw Himalayan salt is found around 800m into the Earth.

The salt is mined by a family business in the Himalayan foothills of northern Pakistan.

The raw salt is cut into shape by skilled workers.

Each lamp is fitted with a hand carved Acacia wood base.

Rough salt is collected and transported to the workshop.

The finished Himalayan salt products are checked for quality and texture.

The salt is packed carefully by hand to ensure quality and consistency.

Himalayan salt products are now ready to be used in your home!
